

## THE PREMIER BRAND OF TAMPER EVIDENT SECURITY PRODUCTS

LABEL LOCK™ SECURITY LABELS AND WHY THEY'RE THE BEST

### IN-REGISTER TAMPER MESSAGE

In simple terms 'In Register' relates to the fact that the tampered message 'OPENED' sits within the blue label area and will always appear as multiple **complete** words. By comparison you can see on the right that 'The Rest' adopt a wallpaper style tamper message, which makes it very easy to not just replicate them but to produce them on a mass scale.

### HANDY DISPENSER BOX:

Label Lock™ Labels are sold in bespoke, protective dispenser boxes containing 250 labels on a reel. This results in easier storage and a lot less wastage. With the labels remaining inside the protective box you're not going to lose any when the roll drops on the floor or one of the labels sticks to something else.

**MATERIAL** is specially selected because it is designed to deform easily if stretched or heated in an attempt to remove it, but to maintain a good initial strength for applying to the packaging.

**HI-TACK adhesive** – means that Label Lock™ labels will void on almost any surface; many more than standard 'security' materials.

## CLEAR BORDER CONTAINING TEXT

Our unique clear border design with text makes it impossible for anyone to fraudulently replicate or try to replace the seal without leaving some degree of evidence. You see, even if they manage to copy the text, the clear border stops them in their tracks. A standard void label can be copied very easily by importing readily available security materials cut to size and then simply overprinted. This isn't possible with Label Lock™!

## SUB-SURFACE NUMBERING:

Means the numbers can't be changed without voiding the label itself. Every number is recorded by us, so we know when it was made and who it was made for

## COUNTERPARTS

or 'Receipt' labels are available in no-residue so an audit trail can be created easily - no need to rely on hand-copied numbers.

**SEMI-TRANSPARENT MATERIALS** - meaning you can see through the label, which prevents anyone from trying to put a new label over the 'opened' remains of the old one
